ENGINEERING GRAPHICS AND DESIGN P2

NOVEMBER 2021

MARKS: 100

TIME: 3 hours

This question paper consists of 6 pages.

Barcode label

INSTRUCTIONS AND INFORMATION

1. This question paper consists of FOUR questions.
2. Answer ALL the questions.
3. ALL drawings are in third-angle orthographic projection, unless otherwise stated.
4. ALL drawings must be prepared using pencil and instruments, unless otherwise stated.
5. ALL answers must be drawn accurately and neatly.
6. ALL the questions must be answered on the QUESTION PAPER, as instructed.
7. ALL the pages, irrespective of whether the question was attempted or not, must be re-stapled in numerical sequence in the TOP LEFT-HAND CORNER ONLY.
8. Time management is essential in order to complete all the questions.
9. Print your examination number in the block provided on every page.
10. Any details or dimensions not given must be assumed in good proportion.

QUESTION 1: ANALYTICAL (MECHANICAL)

Given:

The incomplete front view and left view of a bolt cutter, views of the parts of the jaws, a title block and a table of questions. The drawings are not presented to the indicated scale.

Instructions:

Complete the table below by neatly answering the questions, which refer to the accompanying drawings, the title block and mechanical content.

[30]

QUESTIONS			ANSWERS			
1	What was Aldin responsible for?		1			
2	What is indicated by the number WVJ-2021-091?		1			
3	Who is the client that commissioned the project?		1			
4	What is the radius of all unspecified curves?		1			
5	What is VIEW 2 called?		1			
6	How many cutting jaws will be required for the full order?		1			
7	How many M8 nuts are required for each bolt cutter?		1			
8	What is indicated by the cross at 1?		1			
9	What type of section is indicated at 2?		1			
10	Determine the complete dimension at: A: B: C:		3			
11	Measure the angle at D.		1			
12	Determine the total length of the cutting jaw.		1			
13	What is the specified depth of the thread on the M8 coach bolt?		1			
14	Complete the cutting plane on the cutting jaw by inserting the arrows. Label the cutting plane K-K.		3			
15	How many surfaces of the cutting jaw must be machined?		1			
16	Referring to the machining symbol in the title block, what is indicated by the symbol at 4?		1			
17	Describe the mistake at 3.		1			
18	With reference to the tolerance, determine the minimum dimension at E.		1			
19	With reference to the welding symbol below (QUESTION 19), match the letter on the symbol with the correct label in the column to the right of this question.		TAIL	1		
			CONTOUR	1		
			WELDING PROCESS	1		
			FINISH SYMBOL	1		
			WELDING PITCH/SPACING	1		
20	Complete, in neat freehand, the pipe below (ANSWER 20), by adding the SANS 10111 convention for an interrupted view, as required for the gaps in the handles of the bolt cutter.		3			
			TOTAL	30		

QUESTION 19

The diagram shows a welding symbol with various components labeled with letters in circles. A dimension line indicates a length of 20-50. The labels are: G (tail), H (contour), K (welding process), L (finish symbol), M (welding pitch/spacing), P (TIG), and N (arrow). The symbol is for a TIG weld.

ANSWER 20

The diagram shows a horizontal pipe with two gaps. The gaps are to be filled with the SANS 10111 convention for an interrupted view, which consists of two parallel lines with short dashes in the middle.

S

ROLLER-FOLLOWER AND
CAMSHAFT DETAIL

QUESTION 2: LOCI (CAM)

- Given:**
- The detail of a camshaft and a roller-follower at the maximum distance from the camshaft centre
 - The position of centre point S on the drawing sheet

- Specifications:**
- The roller-follower reciprocates along the vertical centre line that passes through the centre of the camshaft
 - The **minimum** distance from the **circumference** of the roller of the follower to the centre of the camshaft = 14 mm
 - Rotation = anti-clockwise

- Motion:**
- The cam imparts the following motion to the roller-follower:
- There is a dwell period for the first 45°
 - It then descends 22 mm with uniform motion over the next 45°
 - It descends to its minimum distance with simple harmonic motion over the next 90°
 - It returns to its original position with uniform acceleration and retardation over the remainder of the rotation

- Instructions:**
- Using centre point S on the drawing sheet, draw, to scale 1 : 1, the camshaft and roller-follower in the given position.
 - Draw to a rotational scale of 30° = 8 mm and a displacement scale of 1 : 1, the complete displacement graph for the required motion.
 - Project and draw the cam profile from the displacement graph.
 - Show the direction of rotation on the cam profile.
 - Show ALL construction and projection. [38]

ASSESSMENT CRITERIA					
1	GIVEN + MINIMUM DISTANCE + CL	5			
2	GRAPH CONSTRUCTION	6			
3	PLOTTING GRAPH + GRAPH CURVES	8 ½			
4	CAM CONSTRUCTION	5			
5	PLOTTING + CAM PROFILE	13 ½

QUESTION 3: ISOMETRIC DRAWING

- Given:**
- The front view, top view and left view of a gauge
 - The position of point A on the drawing sheet

Instructions:
Using scale 1 : 1, convert the orthographic views of the gauge into an isometric drawing.

- Make A the lowest point of the drawing.
- Show ALL construction.
- NO hidden detail is required. **[40]**

EXAMINATION NUMBER				4

QUESTION 4: MECHANICAL ASSEMBLY

- Given:**
- The exploded isometric drawing of the parts of a crane hook assembly, showing the position of each part relative to all the others
 - Orthographic views of each of the parts of the crane hook assembly

- Instructions:**
- Answer this question on page 6.
 - Draw, to scale 1 : 1 and in third-angle orthographic projection, the following views of the assembled parts of the crane hook assembly:

- 4.1 The right view.**
- 4.2 A half sectional front view** on cutting plane A-A. Show the right half in section, as seen from the direction of the arrow as shown on the exploded isometric drawing. The cutting plane is shown on the top view of the hook anchor (part 3).

- NOTE:**
- Planning is essential.
 - The drawing must comply with the *SANS 10111* guidelines.
 - The convention of symmetry may NOT be applied.
 - Show **THREE** faces of the M18 nut (part 11) on the right side and **TWO** faces of the M18 nut (part 11) on the left side of the half sectional view.
 - NO hidden detail is required.
